

ACRIB₁₂ONE®

Usage Area: Acrib12one®; Thanks to Tricalcium Phosphate, Magnesium Stearate, Calcium Chloride, D3 and B12 in its content, it is a nutritional supplement that helps the maturation of the bone structure of dogs and cats in the age of growth and development, in the treatment of rickets and osteomalacia, and helping our pawed friends to maintain their solid bone structure and lead a comfortable life in later ages.

Acrib12one®; It is also used during pregnancy and breastfeeding periods to support our animal friends in the process when they need special care.

Usage :

Thanks to the meat aroma contained in the **Acrib12one®** formula, it allows our pawed friends to consume it more comfortably and with pleasure.

Unless otherwise recommended by the veterinarian; **Acrib12one®** is used ½ tablet per day in adult cats, 2 tablets per day in adult dogs and 1 tablet per day in young animals.
